

Comprehensive Surveillance Solution

Challenges During Operation

Security: When there is theft happening in the vehicle, it is hard to recognize the behavior and face through the recording.

Evidence management: It is difficult to manage video evidence.

Maintenance: Most problems are not found until the device gets wrong. Even the maintenance staff comes, he only solves parts of the problem.

GDS: It is difficult to monitor bad driving behavior, such as curving, gliding, revving, idling etc...

Event search: It is inconvenient and complicated to search over speed recording evidence according to report.

Reliability: It is hard to make recording stable after sudden power-off.
